SUMMARY

Senior engineer with 7 years shipping React Native apps to the App Store and Google Play, plus full-stack web with Next.js and NestJS. Today at Globant I own the AI side of the delivery process: agents, skills and workflows that the whole team (UX, product, frontend, QA) uses daily; before that I led the team at Biotoken. I work agent-native: Claude Code daily, plus my own coding agent (450+ commits, 90+ merged PRs) and a development, testing and code-review harness with layered human + agent verification, so a small team ships like a larger one. Fluent working English with US, Canadian and European teams since 2021.

EXPERIENCE

Software Designer · Globant — Feb 2026 – Present
Full-time · Remote

- **Arden University (UK)**, React web app with a Java backend and an upcoming React Native app: own the team's AI-assisted SDLC, building the agent harness inside the repository with Claude Code and Globant Coda CLI.
- Create custom skills, agents and workflows on demand for UX, product, frontend and QA, and onboard every team member onto the tooling.
- **Farmacity** (Argentina's leading pharmacy chain, 370+ stores): Senior React Native developer, carried the client's mobile app project through delivery.

Team Lead – Frontend & Full-Stack · Biotoken — Jan 2025 – Feb 2026
Full-time · Remote

- Led a team of 2 developers: owned delivery, planning and code review for the whole product.
- Built a full-stack platform end to end: NestJS REST API plus React / Next.js web and React Native mobile clients.
- Designed, tested and deployed Solidity smart contracts on Polygon (ERC-1155 linked to ERC-20) that have issued 780+ soil-carbon certificates.
- Set up an agent-driven workflow (Claude Code, custom agents, automated test and review harness) with human sign-off on every merge.

AI Engineer – Agents & Automation · Oblivion Tech — Feb 2026 – Present
Contract · Agent-driven software studio for startups and SMBs

- Built an autonomous coding agent that turns issues into reviewed pull requests: a deterministic state machine orchestrates, the LLM only writes code (450+ commits, 90+ merged PRs, ~300 automated tests).
- Quality gates on every PR: schema-validated plans, dependency readiness checks, read-only AI diff review with prompt-injection detection, and Playwright end-to-end tests with autofix.
- Multi-model routing (Claude, Codex, GLM, DeepSeek, Qwen) with fallbacks, plan/review caching and per-call token and cost tracking, plus an ops dashboard for usage, cost and failed runs.
- Least-privilege security: bot account that cannot change CI or merge its own PRs, pre-push guard and gitleaks secret scanning.
- Shipped client products through the pipeline: a field-service PWA MVP for Voltaico delivered in one week (Next.js 14, NestJS, MongoDB) and a multi-tenant e-commerce platform (NestJS, Next.js).

Senior React Native Developer · YoCripto — Nov 2022 – Sep 2024
Full-time · Remote · Bitcoin-rewards credit card

- Built a new app on Expo SDK 48, launched to a 35K+ waitlist, with push notifications, config plugins and native modules for identity verification (KYC).
- Maintained and stabilized the production React Native / Expo app.
- Built a React admin dashboard from scratch to manage feature flags, A/B tests, themes and user debug data.

Senior React Native Developer · TrueNorth — May 2022 – Oct 2022
Contract · Fintech app for a Canadian client · 13-person team

- Coordinated user stories, backend endpoints, frontend implementation and QA across a 13-person team.

- Built CI/CD on Bitrise to automate building and publishing app releases.
- Migrated 3 React Native apps into a monorepo with shared resources.

Senior React Native Developer · WeDevelop Nov 2021 – May 2022

Contract · Social app for Keller Williams agents · team from the US, Poland and Ukraine

- Built posting, replies, image/video capture (React Native Camera) and GraphQL integration.
- Owned production releases each sprint and ran client demos.

React Native Developer (Lead) · OpenDev Pro Mar 2021 – Nov 2021

US client · Ride-hailing for patients who need special assistance

- Acted as lead developer, mentoring junior and mid-level developers; built both the passenger app (Expo) and the driver app (bare RN).
- Implemented full screen-reader accessibility (VoiceOver, TalkBack), camera OCR, geolocation and maps.
- Stack: TypeScript, Redux, Redux-Saga; ran sprint demos and dailies with the client.

React Native Developer · RazorTech Nov 2019 – Mar 2021

- Sole mobile developer on 2 React Native apps built from scratch, with CI/CD (fastlane, GitLab CI), push notifications and a Ruby on Rails REST API.
- Shipped features on an Angular + Rails lab platform that uses AI image analysis for metaphase detection.

Earlier roles 2017 – 2021

- **Aspire** (contract, 2021): NFT marketplace for a US client in React + TypeScript, IPFS, AWS S3, Firebase Auth, Rails backend.
- **Boxtracker** (freelance, 2018–2019): designed a React + Rails 6 platform that ingests Excel progress files and charts planned vs. actual construction progress; owned the client relationship.
- **Club Preferencial** (part-time, 2017–2019): PHP/MySQL web features with jQuery and an Android (Java) app.

PROJECTS

- **web-quality-kit** (open source, github.com/oblivion-tech-agency/web-quality-kit): Claude Code skills that audit and rebuild marketing sites (audit-landing, design-tokens, rebuild-section, motion-design); used to build my portfolio.
- **job-radar**: TypeScript bot that polls job feeds, filters them with hard rules and an LLM evaluator, and pushes matches to Telegram; ports-and-adapters design, 140+ automated tests.

SKILLS

Mobile	React Native, Expo, iOS and Android releases, native modules, push notifications, Bitrise, fastlane
Web	TypeScript, JavaScript, React, Next.js, Redux, GraphQL, REST, Angular
Backend	NestJS, Node.js, Ruby on Rails, MongoDB, MySQL
AI & tooling	Claude Code, Globant Coda CLI, Codex, AI agents, skills and harnesses, prompt engineering, multi-model routing, LangGraph, OpenSpec (SDD), Playwright, LLM integration, Git, GitHub, GitLab CI, Jest
Web3	Solidity, Polygon, ERC-1155 / ERC-20
Languages	Spanish (native), English (professional working proficiency)

CERTIFICATIONS

AI Fluency: Framework & Foundations · Anthropic · 2026 · verify.skilljar.com/c/sn3869bv9tny

EDUCATION

Associate Degree in Systems Analysis (Tecnicatura Superior en Análisis de Sistemas) · Instituto Juan XXIII · 2013 – 2020

Web Developer program · Next University · 2019 – 2020
